WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

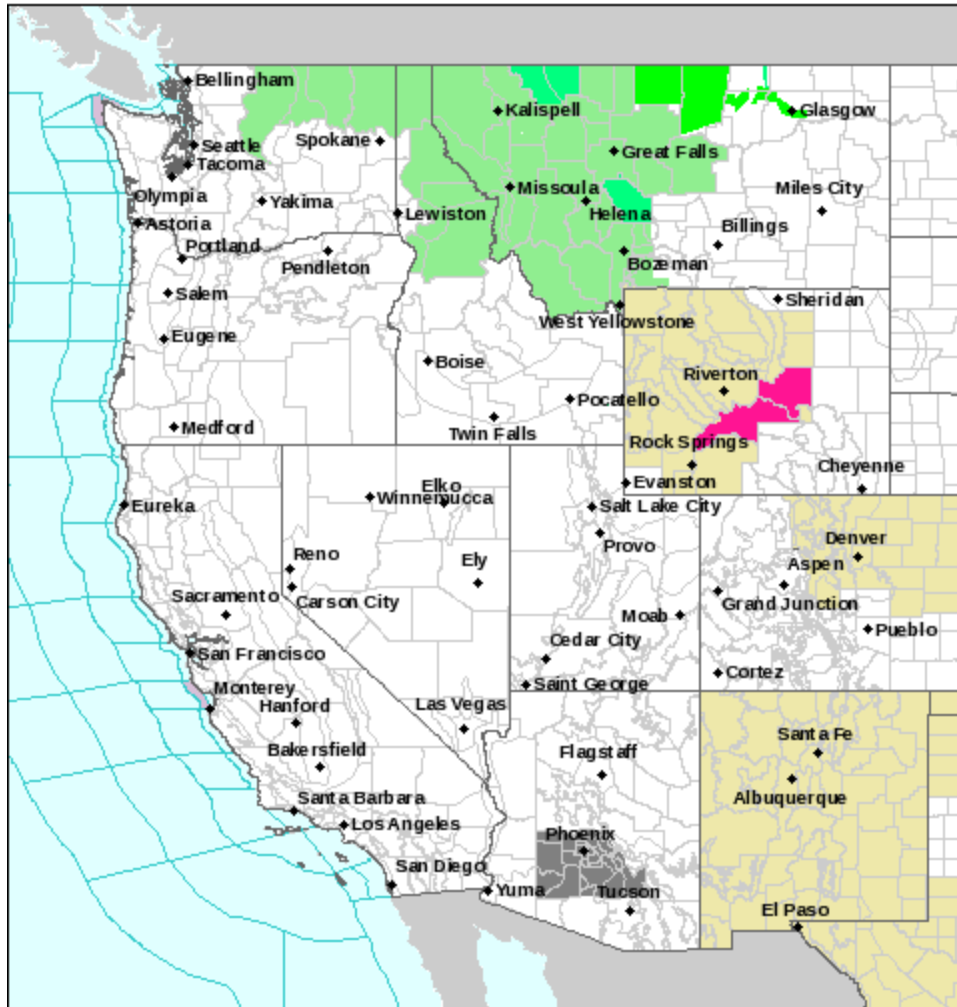

The high pressure ridge will remain dominant today. High temperatures will remain 10 to 20 degrees above normal across most of the region. The windflow will remain rather light with a little bit of a Delta Breeze near the Bay area. Humidity values will rise just a little bit compared to yesterday's readings with the lowest values found across the northeast. A few moderate buildup of clouds will be found over the Cascade and Sierra ranges late in the day but little in the way of rainfall would occur. The ridge will slowly break down Thursday through the weekend as a "cut-off" low pressure area meanders over the area. This low will bring cooler temperatures, higher humidity and some showers and thunderstorms favoring the mountains. Precipitation doesn't appear to be too organized or significant although portions of the Northwest Mountains and Northeast CA Predictive Service Areas could pick up three quarters of an inch during the four day period. Southerly winds will increase Thursday and Friday. Expect peak gusts between 20 to 30 mph Friday afternoon before a weak cold front moves through. Warmer and drier ridging should return as next week progresses. The weather models have been a little up and down with their depiction of the departing low pressure area so early next week is a little more uncertain in terms of shower chances and when the drier/warmer air returns.

SOUTHERN CALIFORNIA

Southeast flow aloft between low pressure off the Northern California Coast and high pressure over the Great Basin will bring isolated afternoon showers and thunderstorms to the Sierra Crest today and scattered afternoon showers and thunderstorms to the Sierra Crest Thursday. Temperatures will be around 10 degrees above normal away from the coastal areas through Thursday, with upper 60s and 70s across the mountains and upper 70s and 80s in the valleys. Minimum humidity will be mainly in the teens above and inland from the marine layer through Thursday. The marine layer will be around 1,500 feet deep. The low pressure area off the Northern California Coast will approach the coast Friday and move inland Saturday bringing significant cooling and a big increase in humidity. Southwest flow aloft on the southern side of the low pressure area will end the shower and thunderstorm threat over the Sierra Friday. A secondary low pressure area will form off the Northern California Coast Sunday and then move over the region early next week. Depending on the exact track of this secondary low, scattered showers and thunderstorms may occur over the Sierra and across Southern California early next week. Westerly winds of 20 to 30 mph with gusts to 50 mph will surface across the wind prone mountain and desert areas Friday through Monday. Temperatures will continue to cool early next week, with well below normal temperatures expected.

Cal OES LAW ENFORCEMENT MISSIONS

Ongoing Cal OES Law Missions

- **2018-LAW-46307, 04/22/18, 1428 hours:** Shasta County is requesting 20 Search and Rescue volunteers to assist in the search for a 71 year old female that left her residence for a walk on 04/20/18 and has not returned. Personnel are requested for one operational period to begin on 04/23/18, 0700 hours. The search is in the Fall River Mills area of Shasta County. Mendocino, Lake, Butte and Siskiyou counties committed the requested personnel. **Update: 04/23/18:** Searches conducted on 04/23/18 were unsuccessful. Mutual Aid resources have been released. Limited searching will continue using local resources. **Update: 04/24/18:** Searches conducted by local resources on 04/24/18 did not locate the victim, but did locate additional clues. Shasta County has requested 30 Mutual Aid Search and Rescue volunteers for a new operational period to begin on 04/25/18, 0900 hours. Siskiyou, Butte and Modoc Counties will provide a portion of the requested resources. Cal OES Law Branch Assistant Chief will monitor. **Mission Ongoing**

Cal OES MISSION TASKING

Cal OES Missions

- **2018-LAW-45645:** Big Sur International Marathon 04/27/18-04/29/18, Tactical Communications Staff and Reserves will be providing communications support to Mission with Radios, Satellite and staff.
- **2018-IREOC-45244:** Caltrans to remove dead and dying trees along highways in Kern, Tulare, Fresno, Madera, Mariposa, Tuolumne, Calaveras, Butte, Plumas, Sierra, Shasta, and Lassen counties. (On Scene – Long-term assignment)
- **2017-SOC-44098:** CalRecycle Debris Management Team in Ventura County (Coordinating)
- **2017-SOC-43821:** DTSC to remove household hazardous waste from over 500 residential lots in Ventura County (On Scene)
- **2017-Inland-42559:** Weather station installed to gather real time rainfall data by Air Resources Control Board (On Scene)
